

1.3.3

PRINCIPLES OF PASSAGE PLANNING

1.3.3.1

There are four distinct stages in the planning and achievement of a safe passage :

1. Appraisal
2. Planning
3. Execution
4. Monitoring

1.3.3.2

These stages must follow each other in the order set out above. An appraisal of information available must be made before detailed plans can be drawn up and a plan must be in existence before tactics for its execution can be decided upon. Once the plan and the way in which it is to be executed have been decided, monitoring must be carried out to ensure that the plan is properly followed.
